- Notes: 1) As of 2010 the US Department of Education requires institutions to gather self-reported race/ethnicity information from new students using a two question format. This new method allows students to pick multiple race/ethnicity categories; prior to the change students had to pick a single category they felt best described them.
- 2) While International (nonresident alien) students also answer the two race/ethnicity questions, their answers are excluded from this area of reporting due to federal guidelines.
- 3) The US Department of Education's IPEDS system gathers enrollment information in a way that requires each student to be in a single race/ethnicity category to prevent a student being counted multiple times and inflating enrollment figures. To accommodate those students who picked more than one race/ethnicity, they are shown in official reporting counts in the "Two or More Races" category rather than in each individual category selected. While allowing for easier reporting, this means that enrollments in the individual race/ethnicity categories look smaller than before the methodology change because students that used to pick one category to best fit their circumstances now move to the new "Two or More Races" category.
