I. Introduction

The following document is intended to provide guidelines for the Annual Faculty Evaluation and the awarding of tenure, promotion, and salary increases to the faculty of the School of Library and Information Studies.

The School of Library and Information Studies, a unit within the professional programs cluster in the College of Arts and Sciences, offers two programs: the Master of Library and
Information Studies and the Bachelor of Arts in Information Studies. The School has the only master's program in library and information studies in the state accredited by the American Library Association (ALA) Committee on Accreditation. The standards for that accreditation in the area of faculty (American Library Association, *Standards for Accreditation of Master's Programs in Library & Information Studies 2008*, "III. Faculty"), together with the expectations of the University of Oklahoma, as set forth in the *Faculty Handbook* sections 3.6–3.7, and the requirements of the College of Arts and Sciences, form the framework in which the School's guidelines for annual evaluation, tenure, and promotion are cast.

The mission of the School is three-fold:

- to engage in **research and creative activities** that generate new knowledge and applications for effective practice and that foster interdisciplinary approaches to address information challenges;
- to provide excellence in **education**, preparing leaders for a diverse, highly technological, information-based global society; and,
- to meet the complex information needs of society through public and professional **service**.

Therefore, the general expectations for performance of the faculty of the School fall within the traditional categories of research, teaching, and service. These categories are interpreted within the context of the connection of all three to the intellectual development of the discipline of library and information studies, to the improvement of professional practice in the service of society, and to the advancement of the goals and objectives of the School, the College, and the University.

Each faculty member should become familiar with the University’s guidelines and the criteria for the awarding of tenure and promotion and as stipulated in this document. The guidelines provide the faculty and the School’s administration basis for judgment in evaluating the performance of individuals and equitably rewarding meritorious performance.

This document also provides the faculty with a guide for the distribution and kind of academic effort that will optimally benefit their careers, and the goals of the School, the College, and the University. It is the intention of these guidelines to provide a qualitative basis for the evaluation of the performance of each faculty member. The weighting of criteria is intended to indicate the relative importance placed on various faculty functions in the School of Library and Information Studies and should not provide a strictly quantitative basis for regarding merit or distributing academic effort. An assessment of the quality of performance of all faculty members will be made on the basis of their position descriptions, and the same documentation will be used for evaluation of all faculty members having similar job descriptions.

The following guidelines define the requisite quality of achievement, assuming a 40/40/20
percent effort distribution in teaching, research, and service, respectively with a 2:2
teaching load. Faculty with special duties will be informed of their job descriptions and
unique criteria for tenure and promotion considerations by the department at the time of
appointment. Changes in the effort distribution of a faculty member can occur after
appointment with the approval of the Director and the Dean in consultation with the
faculty member. The Provost will be informed of any changes in a faculty member’s
distribution of effort.

II. Criteria for Evaluation of Promotion, Tenure, and Salary Increase

Annual evaluations will indicate assessment of performance levels in each of the areas of
research and scholarship, teaching, and service as presented and documented by the faculty
member. It is the responsibility of the individual faculty member to submit a complete and
accurate evaluation packet.

For each area, the methods of assessment and sources of evidence are given below.

Research

Within this category, the School employs a broad definition of scholarship encompassing
research and creative activities that contribute to the intellectual development of the
discipline or that generate new applications for the improvement of professional practice.

Assessment

Evaluation in this category is assumed to rest on the communication and dissemination of
the research and scholarship to members of the disciplines and, as appropriate, to the fields
of practice. Normally, communication takes the form of public dissemination of research
results in journal articles, books, and book chapters. Presentation of research in papers at
professional meetings also constitutes a research achievement, although often as a step on
the way toward publication, and is considered of somewhat less importance or merit.
Research proposals and grants will also be considered in evaluating research activity.

Numerically specific criteria regarding acceptable quantity of research are inappropriate in
Library and Information Studies, in part because of the diversity of research areas and
venues for publication. Normally, an acceptable quantitative standard of research
productivity for tenure and/or promotion will constitute the publication of one new book or
monograph during the probationary period, or one peer reviewed journal article per each
year in rank. The School considers the quantity and, more importantly, the quality, of each
faculty member's research and scholarship. In evaluating these activities, Committee A
will consider factors such as: quality and prestige of journal/publisher, sole versus lead
versus co-authorship, the candidate’s role in the work product, the pertinence of the work
to library and information studies, and related disciplines, and the importance of the work.
It is recognized that scholarly work in some areas may be more difficult to publish in
“traditional,” high prestige journals than work in other areas.
In keeping with the School's recognition of the value of collaborative approaches to the achievement of the School's mission, collaboration in research and scholarship is encouraged. The School recognizes work that has been conducted with other faculty in the School, faculty in other areas of the University, or faculty in other universities, or with students or practitioners, as demonstration of an enriched approach to the solution of information problems.

In accordance with the American Library Association, *Standards for Accreditation of Master's Programs in Library & Information Studies* (2008) the School expects each faculty member to maintain “a sustained record of accomplishment in research or other appropriate scholarship.”

**Sources of evidence**

The primary sources of evidence are the vehicles through which the products of the research and scholarship are disseminated to the members of the discipline or to the field of practice.

Sources of evidence include but are not limited to the sources listed below:

1. Articles published in peer-reviewed journals (indicating extent of involvement)
2. Books published
3. Invited chapters published
4. Books edited
5. Research papers at professional meetings
6. Research funded by external funding agencies, including federal, state, and/or nongovernmental sources
7. Research posters at professional meetings
8. Software produced
9. Research internally funded
10. Non-refereed publications
11. Other research projects in progress
12. Research proposals submitted to external funding agencies and not funded
13. Seminars and symposia
14. Consultation, development, or participation in cooperative research projects
15. Awards for meritorious research
16. Other research productivity

For purposes of consideration for tenure and promotion, in addition to those sources of evidence listed above, assessments of research and scholarship are required from at least six external evaluators from comparable universities.

**Teaching**
Teaching is defined as instruction in regularly scheduled classes, one-to-one instruction in independent studies, supervision of internships, mentoring activities, participation on thesis and portfolio committees, participation on external doctoral committees, teaching/training grants, and design of instructional materials.

Assessment

Teaching performance of high quality is expected of all faculty members and such performance is judged on the basis of current and former student evaluations, peer evaluations, course materials, and other pertinent information. The candidate must demonstrate the ability to present relevant and current information and ideas in a manner that promotes and is conducive to learning.

Sources of evidence

Sources of evidence include but are not limited to the following:

1. Course evaluations
2. Course enrollment
3. Syllabi and related instructional materials
4. Development of new and/or innovative courses
5. Major course revisions
6. Formal peer evaluation of delivery of instruction
7. Teaching/training grants
8. Publication of textbooks
9. Development of instructional materials
10. Advising and mentoring of graduate and undergraduate students
11. Seminars/workshops presented
12. Service on external graduate student committees
13. Teaching/training grants submitted to external funding agencies and not funded
14. Invitations to teach or lecture in other schools and departments in areas of subject expertise
15. Outside evaluations of teaching at other institutions, off-campus workshops, and institutes
16. Participation in faculty development activities
17. Awards for meritorious teaching
18. Other teaching activity

Service

The School evaluates professional and public service and service in support of School, College, and University governance. Faculty members are expected to contribute in all these service areas. The relationship of service activities to the School's goals, objectives, and priorities will be considered in weighing the value of a faculty member's service.
Assessment

SLIS faculty members are expected to provide leadership in response to the information needs of library and information professionals and to society. The degree and quality of professional activity and service at local, state, regional, national, and international levels will be evaluated. As with research and teaching, consideration is given to the quality as well as quantity of professional and university service. Leadership roles in professional organizations, invited and/or elected service to the discipline, and reviewing activities are evaluated.

All faculty members are expected to serve on committees within the School. Conscientious performance of particularly demanding and time-consuming assignments will be appropriately recognized. Commendable work on College committees and University committees, councils and the like will receive positive recognition. Tenured faculty members have a special obligation to undertake service beyond the School level. Tenure-track faculty members are expected to maintain an appropriate service balance under the guidance of Committee A.

Sources of Evidence

Sources of evidence include but are not limited to the following:

1. Election, appointment, or other leadership in professional organizations
2. Service as editor or on editorial boards
3. Reviews of papers for professional journals
4. Reviews of research proposals for funding agencies
5. Presentation or organization of workshops and seminars
6. Sessions chaired at professional meetings
7. Membership on accreditation teams
8. Service on advisory committees and professional boards
9. Review of tenure or promotion dossiers
10. Service on local, state, or national committees
11. Professional consulting
12. Mentoring of alumni and others within the profession
13. Service publications
14. Awards for meritorious service
15. Other service activities

III. Tenure

A candidate at the rank of Assistant Professor or above, to be considered eligible for tenure, must have demonstrated during the probationary period consistent growth and development in the areas of teaching, research and scholarship, and professional and university service.
Recommendations for tenure must be consistent with the goals and objectives of the School and the goals of the University. Any major change in the direction or purpose of the School will affect tenure deliberations.

**Research** qualifications will be judged on the basis of an active and meaningful research program. Research and scholarship performance must compare favorably in the combination of quality and quantity with that of colleagues at the same rank in similar schools. Evidence of research quality will be based on a thorough review of all research accomplishments. Especially important in this regard will be the recommendation of external evaluators.

**Teaching** performance of high quality will be expected of all faculty members and such performance will be judged on the basis of student and former student evaluations, peer evaluations, course materials, student advising and mentoring, and other pertinent information. The candidate must demonstrate the ability to present relevant and current information and ideas in a manner that promotes and is conducive to learning. Teaching performance must compare favorably to colleagues at the same rank in the School incumbent at the time of his/her candidacy. The teaching activities of the candidate during the probationary period should receive favorable peer evaluation by evaluators within the University who are competent to make such evaluations.

**Service** performance is an indication of a faculty member’s collegiality, ability to perform in teams, and professional communication skills and will be considered in tenure evaluation. The quality, rather than quantity, of service activity will be evaluated, however the award of tenure will be primarily based on demonstrated excellence in teaching and research and the promise for continued achievement in these two areas. As far as possible, the School strives to spare tenure track faculty members heavy administrative or committee assignments so as not to impede development of the candidate’s research and teaching programs. New faculty members will be advised by the Director of this fact upon accepting a position in the School and service assignments will be made judiciously.

All tenure-track faculty members will be evaluated for tenure according to the criteria in Section II above, unless the tenure-track faculty member is hired to perform some special task, which would include duties outside usual faculty responsibilities.

**Progress Toward Tenure Letters**
Tenure-track faculty members will be provided with a progress toward tenure letter during each year in which they are in probationary status. The purpose of this review is to provide feedback to the faculty member on the degree to which they are meeting the expectations for earning tenure. The letter should give an honest and frank evaluation as to how the faculty member is progressing in the quantity and quality of their teaching, research, and service relative to their stage in the tenure process. The letter should reflect on the faculty member’s cumulative accomplishments while employed at OU and should use as a reference point the academic unit’s criteria for tenure and promotion. The letter should
include a copy of the criteria by which the faculty member will be evaluated during the tenure decision.

A copy of the progress-toward-tenure letter will be sent to the Dean. The Dean will review and forward copies to the Provost.

Third Year Review
At the beginning of the third year of probation, each non-tenured, tenure-track faculty member will assemble his/her dossier for review by three external evaluators chosen by Committee A from a list of names submitted by the faculty member and Committee A members. These external evaluators will provide written and confidential reports of the candidate’s research program, focusing on progress and potential for future success. All tenured faculty members will review the candidate’s dossier, including the external letters of evaluation. All tenured faculty members of the School will vote, by secret ballot, on whether there has been satisfactory or unsatisfactory progress towards tenure. The outcome of the vote will be shared, in writing, with the candidate and the Dean of the College.

IV. Promotion

The criteria for promotion to the ranks of Associate Professor and Professor emphasize academic and scholarly achievement within the individual faculty member's field(s) of research specialization and within the university community. Promotion to the rank of Associate Professor and the award of tenure will, for most faculty members, be considered concurrently. However, if the evaluations for tenure and promotion are not conducted jointly, a faculty member has the right to request the review of his/her vitae for promotion to Associate Professor or Professor.

Associate Professor

In general the criteria and procedure for promotion to Associate Professor are the same as those for tenure, so that promotion to Associate Professor will accompany the granting of tenure. To be considered eligible for promotion to the rank of Associate Professor, a candidate must have demonstrated substantial growth during the time in rank. Growth will be based on excellence in research and scholarly activities and teaching and the promise for continued achievement. Conscientious and active participation in School, University, and Discipline governance and professional service will also be considered but is less significant than either teaching or research activities. It is expected that the candidate will continue development as a teacher and a scholar and in service to the profession and the university in a manner that will support promotion to Professor in a reasonable period of time.

Professor
To be considered eligible for promotion to the rank of Professor, the criteria will be the same as those for promotion to Associate Professor; however, the level of attainment within these criteria will be greater for promotion to Professor. It is expected that the candidate will demonstrate promise for continued contribution as a teacher and a scholar and in service activities that will enhance the image of the School and the University.

In exceptional cases, promotion to Professor may be based primarily on recognition of superior performance in teaching or service. Such promotion will only be made on the basis of exceptional teaching or service, which, at a minimum, has been recognized by University awards for such activities.

V. Renewable Term Faculty

The following provisions apply to faculty who are appointed year-to-year for a specific term of years. Such faculty will be referred to as “term faculty.” A term faculty member may be given the title of Instructor, Lecturer, Assistant Professor, Associate Professor, or Professor, as appropriate to the individual’s professional credentials and background. The length of the term will ordinarily be three to five years, except as approved by the unit, Dean, and Senior Vice President and Provost.

Renewable term faculty members with the title of Assistant Professor, Associate Professor, or Professor are defined as part of the Regular Faculty on the Norman Campus. Such faculty members are recruited and hired using the same University recruitment procedures employed to recruit and hire tenure-track faculty members. Renewable term faculty members at the rank of Instructor and Lecturer may be hired in the same manner as temporary faculty. A national search is allowed but not required.

Renewable term faculty members shall have all the rights and responsibilities of other faculty members with their titles, except as provided by this policy or by College and University policies. Rights and privileges restricted to tenured and tenure-track faculty members by this policy include voting on tenure decisions, which is reserved to tenured faculty members [Norman Campus Faculty Handbook, section 3.7.5], and serving on Committee A, which is restricted to tenure, tenure-track and ranked renewable term faculty members [Norman Campus Faculty Handbook, section 2.8.2]. Otherwise, renewable term faculty members fully share the rights and duties of the tenured and tenure-track faculty, including but not limited to: involvement in faculty governance and curriculum development; and, eligibility for career development opportunities such as internal college and departmental support for professional activities. The duties of renewable term faculty members will ordinarily emphasize teaching and service with a 3:3 teaching load. However, a renewable term faculty member's distribution of effort may include research, teaching, and service, in any combination consistent with the needs of the School and College and University rules. Committee A will develop general guidelines for annual evaluation and promotion for individual renewable term faculty upon appointment.

Term faculty shall be evaluated annually as part of the process applicable to all faculty
members, using criteria listed in this document and as specified in the Faculty Handbook section 3.11. The renewal decision will be accomplished by the same procedure employed for tenure-track faculty in their probationary period. The faculty member will be notified of the Department’s recommendation of annual renewal or non-renewal no later than March 1. During the final year of the term, and prior to notifying the faculty member whether or not he/she will be reappointed to a subsequent term, the faculty member will receive a comprehensive evaluation of his/her performance during the entire term. The faculty member will be notified of the Department’s recommendation of term renewal or non-renewal no later than March 1 of the final year of the term. The Director will accomplish consideration of annual or term renewal, with recommendations from Committee A.

Term faculty members also are eligible for promotion using procedures and criteria in this document and as specified in the Faculty Handbook. To be considered for promotion to the rank of Lecturer or Assistant Professor, the candidate must have completed a doctoral degree in a field appropriately related to the programs and needs of the School of Library and Information Studies.

VI. Split Appointments

In the case of faculty members holding a split appointment, the chair/directors and Committees A from both SLIS and other unit will collaborate on one annual evaluation, one progress-towards-tenure letter, and one record for any other form of review and evaluation. In the case wherein there is disagreement between the academic units as to the appropriate evaluation, the next higher academic administrator shall resolve the conflict. For split appointments wherein both academic units are within the same college, this person shall be the academic dean of the college; for split appointments across two colleges or provost-direct academic units, this person shall be the Senior Vice President and Provost.

VII. Salary Increases

The annual award of salary increases in the School of Library and Information Studies will be consistent with the guidelines specified in the Faculty Handbook section 3.11. Merit increases in salary shall be awarded on the basis of superior academic performance of faculty members during the time period since the last merit increase.

Because yearly qualification of faculty effort may be difficult to evaluate, it is incumbent on the School’s administration to maintain an awareness of the academic activity of all faculty. The criteria used for salary increase are the same as for the granting of tenure and promotion. The Director will send recommendations for salary increase to the Dean of the College.

VIII. Review Procedures

Each summer the Provost distributes the Call for Tenure and Promotion Recommendations
and the *Tenure/Promotion Packet* detailing the procedures and timetables for tenure and promotion to the candidates for tenure and candidates for promotion as well as e-mails these to the deans, directors, and chairs. The packet is also available on the Provost’s website: ([http://www.ou.edu/provost/pronew/content/memorand.html](http://www.ou.edu/provost/pronew/content/memorand.html)) under “Call for Tenure and Promotion: Committee Dossier Checklist and Forms.”

Similarly the Provost sends out a *Call for Annual Faculty Evaluations* in December. In late January each faculty member will submit electronically submit a *SLIS Annual Faculty Activity Report*, their one-page mini-vita, and full vita to the SLIS Administrative Assistant. The SLIS Committee A will review the materials and complete a *Summary Report of Annual Faculty Evaluation* for each faculty member and submit these to the College typically by March 1. The Director will distribute a calendar chronicling the upcoming tenure, promotion, and annual evaluation events in the Fall.

For tenure and promotion candidates, in March of the academic year preceding the one in which the review will occur, the Director of the School, on behalf of Committee A, notifies the candidate for tenure and/or promotion that the review will take place and the calendar for the review. In addition, the Director requests nominations by the candidate of six individuals who are qualified to serve as external evaluators, following guidelines for such individuals established by the Provost and by the College of Arts and Sciences *Guidelines for Faculty Evaluation*. The Director also requests copies of the candidate's statement on research and scholarship, teaching, and service and copies of all the candidate's publications.

Committee A reviews the individuals nominated by the candidate for conformance with the Provost's criteria. In the case where one or more of the nominees do not meet the criteria, the candidate is notified and requested to submit additional nomination(s). Committee A also nominates six individuals to serve as external evaluators and who are qualified to make an accurate assessment of the research and scholarship of the candidate. The Director will forward the resultant list of evaluator names to the College for approval by the Dean or Associate Dean by June. The Director will invite the approved reviewers to participate in the review requesting their letters by early September.

In all cases, recommendation for the award of tenure and/or promotion to Associate Professor will be made by a secret ballot vote of the tenured faculty, based in part on evaluation of professional competency solicited from external referees. The candidate will receive a letter notifying him/her of the outcome of the department’s vote to support or deny tenure within a few days of the vote. How individual faculty vote must be kept secret; however the outcome of the vote may be revealed to the candidate at the candidate’s request. The vote of the faculty and the recommendation for tenure will be forwarded to the Dean of the College.

In the case of a candidate for promotion to professor, the same procedure is followed as for Associate Professor detailed above, with the exception that only the members of the tenured faculty who hold the rank of professor review the materials and meet to discuss the
candidate. All members of Committee A, regardless of rank, participate in the review of materials and the vote of Committee A on the candidate.

Proposed by Committee A, April 8, 2013; Approved by SLIS Faculty, May 6, 2013; Revised October 21, 2014
